

My name is Romaniuc Vasile, and I'm born in 20th December 1977. I live in Gropnita village in Iasi County. I graduated secondary school in my native village without pursue higher education because of my financial situation. I got married in 2004 and I have two children, (11 years old Alexandru Ionut and 9 years old Elena- Valentina). In 2014 because of a terrible disease, my wife Romaniuc Daniela passed away at the age of 30. Now I am widowed with two children and I struggle without my wife to raise my children with the help of my mother, and the help of everyone surrounding me.

I accepted the attendance to GLEP-PLUS project because its schedule and activities can help in my children education. I accepted that my two children to take part in this project and its activities, because I want that they gather knowledge from different fields through these activities.

In the same time, they are participating in all the non-formal activities well developed along other kids and parents, these again being very useful.

This project made me care more about my children's education and to work more to give them a better future. The information that I gathered in the orientation sessions help me a lot to improve my family lifestyle.

I'm thankful to be in this group of parents, participants to this project, and I want to express my desire to participate in the upcoming projects supported by you.
